

Swapnil Narwade

MCA Student | Aspiring Data Analyst / Web Developer

+91 8007584863 | swapnilnarwade12@gmail.com | github.com/swap_12_03 | linkedin.com/in/swapnilnarwade1203

Summary

Fresher with strong fundamentals in Python, SQL, Power BI, Excel, HTML, CSS, JavaScript, and PHP. Experienced in building dashboards, performing data analysis, and developing database-driven web applications. Actively seeking an internship opportunity to apply technical and analytical skills in a real-world environment.

Technical Skills

Programming Languages: Python, SQL, Java, PHP, JavaScript

Data Tools: Power BI, Advanced MS Excel

Web Technologies: HTML, CSS, JavaScript

Concepts: Data Cleaning, Exploratory Data Analysis (EDA), Dashboards

Education

Master of Computer Applications (MCA) *Currently Pursuing* SEM-I SGPA:8.2
Pimpri Chinchwad College of Engineering, Pune

Bachelor of Business Administration (Computer Applications) CGPA: 8.86
Ness Wadia College of Commerce, Pune

Higher Secondary Certificate (12th) 2020 75.60%
Vidya Pratishthan College of Arts, Science & Commerce, Baramati

Secondary School Certificate (10th) 2018 88.60%
Ravindera High School, Bhoom, Maharashtra

Projects

- **Placement Cell Website** | HTML, CSS, JavaScript, PHP, MySQL
Designed and developed a web-based system to manage student placement activities and recruiter information. Implemented secure user authentication, form validation, and role-based access. Built backend logic using PHP and MySQL to perform CRUD operations. Improved placement data organization and reduced manual record handling.
- **Healthcare System Analysis** | Power BI
Analyzed healthcare datasets to identify trends in patient data and operational performance. Performed data cleaning and transformation before visualization. Designed interactive dashboards with KPIs and filters. Enabled data-driven insights for better healthcare analysis.
- **Real-Time Sales Analytics Pipeline** | SQL, Python, Power BI
Designed a real-time data analytics pipeline to process and analyze sales data. Used SQL for data extraction and transformation from transactional datasets. Applied Python for data preprocessing and automation. Built Power BI dashboards to visualize real-time sales metrics and trends.
- **E-Crime Management System** | HTML, CSS, JavaScript, PHP, MySQL
Developed a role-based web application to manage and track crime records digitally. Implemented secure data storage and retrieval using MySQL. Designed user-friendly interfaces for police and administrative users. Improved efficiency and accessibility of crime-related data.

Certificates & Achievements

- 98.92 MAHA-MCA CET 2025
- SQL 50 LeetCode
- GenAI Powered Data Analytics Job Simulation
- Power BI Workshop Office Master
